Indoor wall mounted safety shower with ASA closed eyewash

EXP-33G/45G EXP-33GS/45G

If indoor space is at a premium, this wall mounted combination shower is a great option. The emergency safety shower is activated quickly using the easy-grip pull handle, while the integral lid of the eye/face wash connects to the water valve for automatic operation when the lid is pulled down.

Designed with EN-15154 and ANSI 358.1 standards in mind, the shower nozzle delivers an evenly distributed flow of water at 76 litres per minute. The high flow rate aerated diffusers of the eye wash unit provide a gentle washing action to prevent any further injury to the eyes.
